

James Le

As a self taught software developer, I have completed multiple projects which range from multi million pound custom Ecommerce websites to iOS/Android apps. Outside of programming I enjoy the occasional badminton game, soju bomb and tilt proof game of League of Legends.

EXPERIENCE

KP Studio, Northampton

Software Developer

May 2021 - PRESENT

As a software developer my day to day responsibilities include:

- Developed Mobile Apps using a Rest API
- Create and maintain custom WordPress themes and plugins
- Bespoke software maintenance and development
- Maintained relationship with clients to understand scope of work
- Project management

Emplas Window Systems, Northampton

Junior Software Engineer

January 2021 - April 2021

The responsibilities of this role are to help debug platform issues and migrate legacy code to newer technologies.

I also created console apps using JIRA as the ticket system along with running SQL queries to help provide data analysis.

PROJECTS

UK Health Testing— *Ecommerce website*

WordPress, WooCommerce

A WordPress site using the plugin WooCommerce that I developed with a custom theme as well as custom functionality. Due to the constant changes that Covid had created I had to constantly adapt and create new functionality.

Circular 1 Health — *Ecommerce website*

WordPress, WooCommerce

A nation-wide general health testing company that I worked directly with to scope requirements and then distribute work to other junior developers.

KP Studio — *Portfolio*

Node.js, Jest

A company portfolio re-design to highlight recent work and to keep modern. I also incorporated media queries that allowed for a responsive view across all devices as well as implementing Jest for testing.
