James Le

As a self-taught software developer, I have completed multiple projects which range from multi-million-pound custom Ecommerce websites to iOS/Android apps. Outside of programming I enjoy the occasional badminton game, soju bomb and tilt-proof game of League of Legends.

EXPERIENCE

Movable Ink, London

Front End Developer L2, Client Solutions

Nov 2022 - Present

As a front end developer my day to day responsibilities include:

- Built, tested, troubleshooted and delivered client-specific apps and dynamic experiences on the Movable Ink Platform
- Balanced multiple projects at once with autonomy and ownership while maintaining a 99% SLA record
- Maintained up-to-date BRDs while improving their clarity and structure for better alignment across 3 teams.

KP Studio, Northampton

Software Developer

May 2021 - Nov 2022

As a software developer my day to day responsibilities include:

- Developed Mobile Apps using a Rest API
- Create and maintain custom WordPress themes and plugins
- Bespoke software maintenance and development
- Maintained relationship with clients to understand scope of work
- Project management

Emplas Window Systems, Northampton

Junior Software Engineer

Jan 2021 - Apr 2021

The responsibilities of this role are to help debug platform issues and migrate legacy code to newer technologies.
I also created console apps using JIRA as the ticket system along with running SQL queries to help provide data analysis.
